Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claims 1, 11, 19 and 26 have been amended. Claims 1, 2, 4, 5, 10-14, 17-22, 25-28 are pending and under consideration.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 26-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Lamparski et al (U.S. 6,812,023) as evidenced by Aswad et al (Journal of Pharmaceutical and Biomedical Analysis, 2000, vol. 21, pp. 1129-1136).

Claim 26 is drawn in part to a composition comprising protein tumor antigens, wherein said protein comprises an isoaspartic acid residue and a pharmaceutically acceptable carrier. Claim 27 is drawn in part to the carrier which is an electrolyte solution. Claim 28 is drawn in part to a carrier which is water.

Lamparski et al teach the collection and processing of exosomes obtained from the culture supernatants of tumor cells, termed texosomes (column 1, lines 46-56) and the freezing and storage thereof (Figure 1). Lamparski et al teach the use of the tumor cell exosomes for pharmaceuticals (abstract) and PBS as a formulation buffer (description for figure 10) which meets the limitation of water and “electrolyte solution”.

Art Unit: 1643

Aswad et al teach that the formation of isoaspartyl peptide bonds is one of the most common forms of non-enzymatic degradation of peptides and proteins under conditions of mild degradation (abstract) providing evidence that the pharmaceutical compositions of tumor exosomes collected and stored by Lamparski would include tumor antigens comprising an isoaspartyl residue.

Claims 1, 2, 4, 5, 10-14, 17-22, 25 are free of the art.
